## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed January 29<sup>th</sup> 2009 has been entered and made of record.
2. Applicant has amended claims 18, 20, 29, 30 and 34. Claims 1-17, 19, 21, 23, 26-27 and 31-32 have been cancelled. Claims 18, 20, 22, 24, 25, 28-30, 33 and 34 are now pending.
3. Applicant's remarks in view of the newly presented amended claims are found to be persuasive in overcoming the cited prior art. Independent claims 18, 29 and 34 are found to be in condition with allowance as well as the subsequent dependent claims. Reasons for allowance are found below.
4. Examiner also conducted a personal interview with Applicant's representatives, which is detailed in the attached interview summary.

### ***Examiner Amendment***

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Muffo, Reg. No. 60,342 on March 24<sup>th</sup> 2009.

The preamble of Claim 18 should be amended to read:

“A method for a stereographic image generation apparatus for generating a stereographic image, the method comprising:”

The preamble of Claim 34 should be amended to read:

“A computer program product embodied on a computer readable medium, which when executed by a computer causes the computer to function as:”

### ***Allowable Subject Matter***

6. Claims 18, 20, 22, 24, 25, 28-30, 33 and 34 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's remarks in view of the amended claims are found to be persuasive.

The cited references to Murata and Isao do not teach nor fairly suggest the combination of claimed features as now recited. Murata teaches calculation of depth values and Isao teaches the calculation of depth values using color components, but neither reference teaches using predetermined weights of color components and adjusting the depth value involving obtaining an average of depth values within an area, and determining step size quantization based on a user specified parameter. No other found prior art of record teaches or fairly suggests the combination of claimed features now recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
